Yes, we saw that. The new time will fit schedules better. We're aiming to send the draft ITS section to you all as soon as possible, and before Wednesday's meeting.

Thanks,
Lasha

Ok no worries, we'll go forward with our call as scheduled. Darren will be calling in from home. I don't know if Mary will be joining us, she's in Portland for a meeting. Eric, should be calling in.

Will talk soon,
Lasha

Hi Lasha,

I think the point of today's call was for the entire team to catch up and see where we are with the BO. If you would rather wait until the 12th, I would suggest having Darren request to reschedule. I'm okay with it but CDR Powell is the one who scheduled the meeting.

Hi Coralie,

My apologies for the delay in replying; I thought I sent the reply earlier. We do not need anything from the DON, at this time, and we do not have anything for the DON to review.

While I am a bit more behind than I had anticipated due to some unexpected leave I had to take, we are in good shape and on schedule.

According to my calendar we have a conference call scheduled for today, July 10, is that correct? Any chance we could move it to the 12th?

If not, that's fine too. I'm at my desk if you need to chat.

Thanks, Lasha

Subject: RE: [Non-DoD Source] Reporting Requirements - Draft language

Lasha,

We have developed our own recommended text that we would like to propose in lieu of the language below.

"In order to monitor the impact of incidental take, the DON must report the progress of the action and its impact on the species, to the Service as specified in the incidental take statement [50 CFR 402.14(i)(3)]. The DON will submit annual reports detailing the implementation of the Reasonable and Prudent Measures, associated Terms and Conditions, and document any incidental take for each species. The first report will be due at the end of fiscal year 2018. Reporting will be required until the Conservation Measures are fully implemented."

The concern we have with the language below is that it is too specific and could be construed as excluding information that is not specifically requested. For example, item 2 is a "summary of pre-construction surveys and translocation work conducted to minimize take of listed Partulid snails and the Mariana eight spot butterfly." However, pre-construction surveys for bats is also part of our conservation measures. Item 4 is "take monitoring information for the Mariana fruit bat (e.g., monitoring information on roosting sites within the action area" but take monitoring for snails and butterflies is not included in this item. We can discuss via a conference call if you would prefer. I will be back in Colorado tomorrow and we can discuss then or next week, whatever works best for you.

Coralie

Subject: [Non-DoD Source] Reporting Requirements - Draft language

DON shall submit an Annual Implementation Report to the Service, that will include but is not limited to the following information: (1) implementation of all conservation measures, including out-planting/translocation activities and ungulate control and eradication efforts; (2) a summary of pre-construction surveys and translocation work conducted to minimize take of listed Partulid snails and the Mariana eight spot butterfly; (3) implementation of the components of the proposed action (e.g., clearing activities, vertical construction); (4) take monitoring information for the Mariana fruit bat (e.g., monitoring information on roosting sites within the action area; and (5) any other information that may affect or relate to conservation targets and objectives specified in this BO. An agreed upon template and meeting arrangements may be developed in order to reduce the preparation time or to concisely provide the information.
